WAG (Workstation Administrator's Group)
Mission Statement

The mission of the WAG is to provide a forum to facilitate the collaboration of information on desktop technologies. The primary focus of the group will be the following:

1)   Increase an understanding on the current systems and creating guidance for implementing future technologies relative to Microsoft workstation OS and productivity suite upgrade.

2)   Information sharing on workstation software configurations.

3)   Workstation hardware and software deployment best practices.

4)   Provide educational opportunities with subject matter experts (internal and external).

5)   To help utilize the State's investment in the workstation technologies.

6)   Other software topics of interest to the group.

The group will meet periodically.   Representatives will be selected by agencies who have a primary responsibility for supporting desktop computers.

Note: The CIO Council is the sponsor and "guide/mentor". The Workstation Administrator's Group shall report its findings, conclusions and recommendations to the CIO Council.
